1. INTRODUCTION

1.1 This Consultation Statement has been prepared by the Earls Barton Neighbourhood Plan Project Group (EBNPPG) to conform with the legal obligations of the Neighbourhood Planning Regulations 2012.

1.2 Section 15(2) of Part 5 of the Regulations sets out what a Consultation Statement should contain:

(a) contains details of the persons and bodies who were consulted about the proposed neighbourhood development plan;
(b) explains how they were consulted;
(c) summarises the main issues and concerns raised by the persons consulted;
(d) describes how these issues and concerns have been considered and, where relevant, addressed in the proposed neighbourhood development plan.

1.3 This Consultation Statement summarises all statutory and non-statutory consultation undertaken with the community and other relevant statutory bodies and stakeholders in developing the Earls Barton Neighbourhood Development Plan. The previous Consultation Statement issued in December 2013 set out all of the consultation up to the statutory Regulation 14 consultation. This version now takes account of that consultation carried out in March and April 2014 updating the report for the purposes of supporting the submission of the Plan to the Borough Council of Wellingborough.

1.4 The aims of the Earls Barton Neighbourhood Plan consultation process were to
• ‘front-load’ the consultation, so that the Plan could be informed by the views of local people and other stakeholders from the earliest stage;
• to ensure that consultation events and drop-in sessions enabled people ‘have their say’ and get feedback on the emerging plan at key points in the process and when decisions were required;
• to engage with as wide a range of people as possible, using a variety of events and communication techniques; and
• to ensure that results of consultation and updates on the neighbourhood plan were provided for local people as soon as possible after consultation events through the most appropriate and widely read media.

1.5 Earls Barton Parish Council and EBNPPG have been explicit in their desire to make the neighbourhood plan a community led document. The Project Group was established from community volunteers with Parish Council representation and the widest range of people and groups have tried to be engaged.

1.6 Consultation was undertaken by the EBNPPG with the support of the Neighbourhood Plan Project Manager. Consultation events and surveys took place at the following stages in the neighbourhood planning process:
• an initial launch event held on 18 April 2012 to commence the Neighbourhood Plan process, consider issues and challenges and to raise awareness of the project and a further drop-in session took place on 21 April. An exhibition was also located in the library between 19 April – 7 May;
• an ‘issues’ survey conducted between May and June 2012;
• a ‘call for sites’ from local landowners during July 2012;
• a housing needs survey conduction in collaboration with the Borough Council of Wellingborough during August and September 2012;
• a vision, objectives and strategic options workshop held on 15 November 2012 with follow up drop-in session on 17 November 2012 and 12 January 2013;
• vision, objectives and strategic options survey conducted between December 2012 and January 2013;
• consultation on the preferred option in October 2013;
• a 6 week Regulation 14 consultation on the draft plan between 19th March 2014 and 30th April 2014.

1.7 This Consultation Statement provides an overview of each of the above stages of consultation in accordance with Section 15(2) of Part 5 of the Regulations. Further details are provided on the Neighbourhood Plan website.

2. BACKGROUND TO CONSULTATION ON THE NEIGHBOURHOOD PLAN

2.1 Earls Barton Parish Council agreed to undertake a Neighbourhood Plan in November 2011. A community project group was established from a request in an article with 2 local magazines and a project manager was appointed in January 2012.

2.2 The level of consultation that has been undertaken for the Neighbourhood Plan goes beyond that required by legislation as the Parish Council and EBNPPG has continuously sought to work with the local community to make the plan, as much as possible, reflect their views and wishes. Both groups have also sought to work closely with the relevant Planning and Local Authorities, Borough Council of Wellingborough and Northamptonshire County Council and thanks should be given for their support in this regard.

2.3 In preparing the Earls Barton Neighbourhood Plan the Project Group has consistently ensured that residents and other stakeholders including local authorities, interest groups, land owners, businesses and statutory bodies have regularly been consulted and that their comments have been noted and where appropriate incorporated into the plan as it evolved. In order to make available minutes or Project Group meetings and to update residents and stakeholders on the progress of the plan an early decision was taken to produce a Neighbourhood Plan website so that consultation surveys and events could be publicised and where appropriate information could be provided online.

3. SUMMARY OF CONSULTATION APPROACH TO ENGAGE THE COMMUNITY

3.1 A number of consultation exercises and drop-in sessions were designed by the Project Group to help understand the issues of importance to the wider community, dating back to April 2012. During the preceding time, the views of local residents and other
stakeholders have been obtained through a variety of exercises including survey questionnaires, public events, meetings and written contributions. Contact details for the Parish Council Clerk have been available on the website, www.earlsbartonneighbourhoodplan.org.uk and links have been made to the Parish Council’s website www.earlsbarton.gov.uk. The neighbourhood plan website address has been well publicised in all correspondence and articles to ensure that maximum visibility is available for people to log on to it and engage in the process.

3.2 As described above the central focus of all consultation information has been the Neighbourhood Plan’s website and has been a useful and well-publicised source of valuable and up-to-date information about all aspects, and stages of the Neighbourhood Plan development and includes information on all consultations.

3.3 All updates on the Neighbourhood Plan process and information about forthcoming consultation exercises and events, were also published monthly in Earls Barton’s monthly community magazine – Barton Today and for certain months the All Saint’s Church magazine (The Tower). Updates on key issues relating to the plan and reminders for consultation events and completion of surveys were also done though social media. The Earls Barton Parish Council and Earls Barton Appreciation Society Facebook pages were utilised in disseminating messages about the Neighbourhood Plan.

3.4 Notices and posters for forthcoming events were also a regular means of communication with the community through use of the parish notice boards and by posters within local shop and business premise windows. Short PowerPoint promotional presentations were also produced to be viewed on continual loop in the doctor’s surgery at the time of consultation events.

3.5 All surveys were distributed to all households and businesses within the village either separately by volunteers or inserted within Barton Today which has full coverage for the village. Drop points for questionnaires at the Post Office and sweet shop in the village centre were provided as well as the Parish Council clerk on top of a free post reply service for all surveys.

3.6 The role of the Parish Council has been integral in promoting and supporting the Neighbourhood Plan. As the sponsoring organisation and responsible body the Parish Council has acted as the overarching Steering Group for the project and has provided update reports on the plan as it has considered them at various Council meetings.

4. INITIAL LAUNCH EVENT AND ISSUES SURVEY

4.1 The initial launch event took place on 18th April 2012 in the Earls Barton Infant School Hall. The purpose of the first stage of consultation, which was accompanied by a full village survey during May and June, was to obtain the views of as many people as possible regarding the issue facing the village and opportunities that may be available to be exploited in the future.
Who Was Consulted?

4.2 The whole of the village was consulted either through the launch event and drop-in session or by the survey which covered the same ground as the events. The Launch Event was widely publicised through an article in Barton Today and the Tower Magazines and an exhibition with hardcopies of the survey was positioned in the village library. A range of stakeholders within the village were notified of the event by letter and encouraged to attend.

How were they consulted?

4.3 The launch event attracted 26 people and a variety of techniques were used in order to obtain people’s views about the village. Presentations and exhibition boards were provided to inform stakeholders of the Neighbourhood Plan process and the purpose of the event. A ‘pros and cons’ board was provided with post-it notes and facilitated groups considering the positives and negatives of the village at the present time. A further exercise looked at facilities within the village and whether they were ‘Important’, ‘Neutral’ or ‘Unimportant’ and small groups were assisted to use large scale plans to discuss issues and problems within the village and annotations were made of the points raised.

4.4 The drop-in session was held between in 10am and 1pm on Saturday 21 April and approximately 50 people attended. EBNPPG volunteers were on hand to explain the Neighbourhood Plan process and to discuss points raised. The post-it note exercises were repeated from the Launch Event. A considerable amount of face to face dialogue took place at the event.

4.5 The exhibition boards located at the library included a large plan of the village which enabled people to pin comments on the board of issues they felt were pertinent. A further exhibition was also provided for the Junior School and an EBNPPG volunteer attend the school to discuss issues and record the points made. Teachers at the school also integrated the Neighbourhood Plan and issues it raises as part of the school curriculum in some year groups.

4.6 The village wide survey was distributed to all households and businesses via the Barton Today magazine and nearly 400 responses were recorded.

What did the consultees say?

4.7 The overall summary and conclusions from the initial consultation events and survey regarding issues is as follows and this was fed back to the community in the August edition of Barton Today after analysis was undertaken on the results and comments. Most important in descending order.

Main characteristic that made Earls Barton Special

- Still a village and functions like one.
- Rural setting
- Local facilities
• Open Spaces

Housing needs within the village
• More owner occupied and affordable rented housing
• Greater amount of shared ownership properties
• Starter homes and retirement bungalows were the most demanded type of property

If more homes were built in Earls Barton what changes would concern you most?
• Greater traffic pressure
• Impact on parking
• Impact on schools

Most important existing facilities in the village
• Doctor’s Surgeries
• Chemist
• Shops in general
• Post office
• The library also featured highly, additional facilities that people identified included better parking, a bank, more shops, good restaurants/gastropub’ and better sports facilities/community hall.

Job creation/employment
• 51% of people wanted to see more jobs in the village
• Best way to provide for this was through increased accommodation for shops and local services, a business centre and then additional workshops

Transport issues
• Improvement of travel information through real-time information displays for buses
• Improved links to the railway stations in Wellingborough/Northampton

How were the issues and concerns responded to?

4.8 From this consultation on issues with the community a draft vision and objectives were developed through the Project Group. Three strategic options for how the village might grow in the next 20 years were also developed taking account of residents’ comments and concerns but also considering the level of housing that would be appropriate as a minimum with higher levels of growth which may deliver wider benefits for the village.

4.9 Growth scenarios setting out minimum, medium and high levels of development for the village were produced and tested in the next round of consultation. Before this was undertaken two further consultation exercises were undertaken; a ‘call for sites’ to determine what land might be available to deliver any growth aspirations and a Housing Needs Survey to understand housing requirements for the village.

Call for Sites – Landowner consultation/site availability

4.10 In order to understand what sites might be available to support any potential options for future growth in the village a ‘call for sites’ was issued to known landowners and local agents who were known to operate in the area.
4.11 The Project Group wanted to understand which landowners would be willing to put forward particular sites which could help to achieve the objectives and aims of the plan.

4.12 A pro forma was circulated requesting details and notification was also made of the call for sites in the local magazines. A total of 12 responses were received with 16 individual sites identified. The Borough Council’s Strategic Housing Land Availability Assessment (SHLAA) also provides evidence of what land has previously been identified and assessed in terms of its sustainability criteria.

4.13 After the consultation had ended on 10th August 2012 the Project Group provided an opportunity for all landowners to have a meeting with members of the project group to better understand the emerging aspirations of the Neighbourhood Plan, the process and likely timescales and to discuss any site specific issues or constraints.

4.14 The exercise was very valuable in feeding into the emerging strategic options. A total of 6 landowners were met and further discussions were also held after this point.

**Housing Needs Survey**

4.15 It was decided that a local housing needs survey was required in order to determine what level of housing requirements existed for the village. The existing Core Spatial Strategy provides a blanket housing target for the rural area of 1,210 dwellings to 2021. The Site Specific Plan (Preferred Option October 2010) for Wellingborough has not been progressed and has now been overtaken by the review of the Core Strategy. Housing Needs requirements for villages could not be derived from the Strategic Housing Market Assessment that had been updated for the emerging Core Strategy, therefore, it was decided with the Borough Council that a local Housing Needs Survey should be carried out. A report detailing the methodology of how the Project Group has arrived at a housing target for the village, in conjunction with the Borough Council, has also been produced and accompanies the plan as supporting information.

4.16 Through the knowledge and expertise of the Council’s Housing department a Housing Needs Survey was compiled for Earls Barton requesting a range of information on people’s housing requirements and other concerns for the village. The survey was sent out by EBNPPG in August 2012 with a freepost return envelope and a response date in September 2012 was given as a deadline. The Council then analysed the responses and published a report in October 2012. A total of 772 households completed the survey which represents a 33% return rate.

**Results of Housing Needs Survey**

4.17 The survey revealed that average house prices had fallen significantly over the last 5 years although in the last year preceding the survey a small recovery had occurred. All forms of rent or home ownership within Earls Barton were assessed as being unaffordable on a lower quartile income. With a Median income all forms of rent become affordable, however, open market housing still remains unaffordable for 3, 4 and 5 bedroom properties.
4.18 In terms of households in housing needs a total of 64 respondents regarded themselves having a need either for open market housing (12), social housing (43) or for share ownership (9). A variety of different housing sizes were required with 1 and 2 bedroom bungalows, flats and houses being the most popular.

4.19 As a minimum housing requirement for the village it was estimated that 105 dwellings would be required taking existing commitments into account. The three strategic growth options were developed on this basis providing a low, medium and high growth option for residents to consider. Further work by the Borough Council on the housing needs for rural areas in the Borough (see WBC – Identifying a Rural Housing Target for the Joint Core Strategy) considered that a robust level of housing growth for Earls Barton should provide a minimum of 220 dwellings over the plan period to 2031. 250 dwellings was therefore taken as the maximum level of housing allocation for the village on top of existing commitments and future windfall sites.

4.20 The survey also addressed various concerns that residents had with accepting new development. The greatest concern was for parking (90%) followed by increased traffic congestion (84.5%), pressure on schools (71.2%) and environmental issues (48.7%) which to a large extent supports the findings and results of the previous issues consultation.

5. VISION, OBJECTIVES AND STRATEGIC OPTIONS

5.1 The draft vision and objectives responded to the issues consultation and sought to provide a vision which allowed the village to grow while maintaining the ‘feel’ of the settlement as a village and to protect those issues which residents and stakeholders had regarded as important.

Who was consulted?

5.2 A survey questionnaire was issued to the whole village over Christmas 2012 and hand delivered to all households and businesses by volunteers. The survey set out the draft vision and objectives, proposed 3 strategic options and provide a 4th option for individuals where their views differed greatly from the ones suggested. The consultation also set out various benefits and issues with each option. A database of businesses were contacted by letter to attend the workshop and drop-in session which was arranged prior to the questionnaire being circulated on 15th November and 17th November 2012 respectively. Letters also went out to key stakeholders and landowners who had submitted sites via the previous consultation inviting them to attend the events. Information and publicity regarding the events and survey questionnaire was published in the village magazines and posters were put up around the village.

How were they consulted?

5.3 Residents and stakeholders were consulted through the questionnaire which was printed and distributed. A copy was also available online through the website. An information sheet was also produced and uploaded to the website which provided
further information to enable residents to better understand the options that were being proposed and the potential impact on the village. The questionnaire had comment boxes for people to complete as well as being able to respond yes, no or no opinion to whether they agreed to the vision, objectives and strategic options. 15 people attended the workshop in the Junior School and 41 attended the all morning drop-in session held in the Methodist Church. A range of post-it note exercises and facilitated workshops enabled people to express what they liked and disliked about the vision and objectives and the strategic options.

What did the consultees say?

5.4 The survey was completed by 444 people a return of approximately 20% of all households. The results indicated that 68% of respondents agreed with the vision although some of the detailed comments questioned what criteria there was to determine ‘retaining the key features of Earls Barton Life’. This element of the vision led to some confusion.

5.5 In terms of the objectives the following responses were recorded.

<table>
<thead>
<tr>
<th>Objective</th>
<th>Yes %</th>
<th>No%</th>
<th>No opinion%</th>
<th>Left blank%</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>67%</td>
<td>18%</td>
<td>3%</td>
<td>13%</td>
</tr>
<tr>
<td>2</td>
<td>61%</td>
<td>23%</td>
<td>2%</td>
<td>14%</td>
</tr>
<tr>
<td>3</td>
<td>56%</td>
<td>28%</td>
<td>1%</td>
<td>15%</td>
</tr>
<tr>
<td>4</td>
<td>44%</td>
<td>21%</td>
<td>7%</td>
<td>28%</td>
</tr>
</tbody>
</table>

Strong support was shown for all of the objectives apart perhaps from objective 4. This may have been due to the wording of the objective which may not have been comprehended by all those completing the survey. This seems to be borne out by the higher number that were left blank.

5.6 In respect of the responses to the strategic options the following results were as follows;

<table>
<thead>
<tr>
<th>Option</th>
<th>Yes</th>
<th>Option 2</th>
<th>Option 3</th>
<th>Option 4</th>
<th>No opinion</th>
<th>Left Blank</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>29%</td>
<td>38%</td>
<td>14%</td>
<td>12%</td>
<td>1%</td>
<td>6%</td>
</tr>
</tbody>
</table>

The greatest level of support was expressed for option 2 which was for medium level of growth located to the north of the village on a large in fill site. The least preferred option of those put forward was option 3 which suggested higher level growth to the south of the village. The workshop and drop-in session feedback also largely mirrored this response. Summary comments and points are provided in Appendix 6.

5.7 A high level of comments were made in the response boxes. 71% of all respondents provided comments to the objectives and strategic options. An analysis of key words was undertaken to identify what were the 5 top issues that people had in relation to
their concerns. From the analysis it was found that 124 comments related to traffic, access or congestion; 115 comments were made about the village in general, its size and it remaining a village; 94 comments related to parking issues; 92 comments were made about schools, their capacity and concerns regarding future spaces for village children; and 40 comments were made about doctors and healthcare.

How were the issues and concerns responded to?

5.8 Following this stage of the consultation the strategic housing growth requirement that had been identified for Earls Barton by the Borough Council of Wellingborough, as part of the emerging evidence base for the revised Joint Core Strategy, was reviewed in light of the consultation responses.

5.9 The consultation responses to the Strategic Options indicated that a level of growth of up to 250 dwellings would be preferable concentrated in a defined location to the north of the village associated with a sports and leisure development which could be potentially delivered as part of the development scheme. Low levels of dispersed development were not as well supported or much larger development to the south of the village, where land could be made available, predominantly due to concerns regarding congestion, traffic issues and pressure on parking within the village.

5.10 The results enabled the Project Group to work up a preferred option which focused on the in-fill site around the ‘Grange’ to the north of the village. Discussions took place with the landowners and further in the process the Project Group were informed that a ‘preferred developer’ had been engaged that would be able to demonstrate the deliverability of the preferred option for the Neighbourhood Plan.

5.11 The opportunity was taken to revise the vision statement so that it was less confusing, however, the essence of the original wording was retained as this had been strongly supported. The objectives had also been supported but minor changes were made especially to Objective 4 to make it clearer what this objective was seeking to achieve.

6. PREFERRED OPTION

6.1 The preferred option developed from understanding the previous consultation responses, engaging in a dialogue with the landowners and preferred developer (David Wilson Homes) and through a desire to achieve a long held ambition to deliver better sports and recreation facilities for the village.

Sports and Leisure Proposals

6.2 A project to deliver enhanced sports and leisure facilities for the village, focussed around increased football and cricket pitches and improved facilities, has been a priority for the Parish Council for over 10 years. The project has been well supported by residents of the village, however, the biggest barrier to delivering the project had been gaining control of sufficient land to enable bids to be made to funding organisations.
6.3 Limited facilities exist at the Grange where a shared football and cricket pitch with small pavilion and changing rooms are leased from the Community Union who is the landowner.

6.4 In 2010 a change of use application was approved for approximately 10 hectares of land including all of this land and adjacent land in an attempt to progress the project potentially considering a Compulsory Purchase Order (CPO) if negotiation with the landowners was not achieved. At this time no significant housing development was required within the village, however, a CPO did not prove to be a financially viable option.

6.5 The previous consultations for the Neighbourhood Plan did not specify where potential sports and leisure facilities could be located. It was not felt that this opportunity should be promoted as several locations could deliver this dependent on land availability and housing levels to contribute towards this.

6.6 Now that the preferred strategic option was indicating growth up to 250 dwellings to the north of the village in this location the Project Group actively started to negotiate with the landowners and preferred developer for an amount of land which could provide enhanced facilities.

Who was consulted?
6.7 In September 2013 David Wilson Homes undertook a consultation with the village regarding their proposals for a planning application for the land between the Grange and the Industrial Estate. In order to confirm support for the Neighbourhood Plan’s preferred option the Project Group distributed a leaflet (appendix 7) to all households and businesses in the village via Barton Today. The leaflet set out the preferred option which closely mirrors the David Wilson Homes proposals for that site. Discussions had taken place to ensure that the proposals took account of community views but also that they were financially deliverable.

How were they consulted?
6.8 The questionnaire leaflet was distributed in October 2013 with a return date of 15th October. The leaflet set out a series of sub-objectives for the plan and posed a range of questions in relation to how the preferred option could achieve a number of things which had been raised as issues previously. Notification of the consultation was provided through Barton Today magazine as well as via social media networks.

What did the consultees say?
6.9 A total of 459 people responded to the consultation which represents 19% of all dwellings within the village. From this response 88% stated that they supported the preferred option to the north of the village where access could be provided onto major roads. 40 people disagreed with this and 4 stated they had no view.

6.10 79% of the respondents agreed with the sub-objectives of the plan which had been developed (see Appendix 7). 291 (63%) people supported the development of a small business centre or additional office space within the village and (230) 50% felt it should
be located within the main development area, whereas 64 (14%) preferred it to be closer to the village centre.

6.11 Residents were asked what density of housing would be supported within the new development area. The majority 255 (56%) felt that a medium density of housing between 25-40 dwellings per hectare would be acceptable. 356 respondents (78%) supported the development of a community hall or hub at the preferred option main allocation site. Only 11% felt that it should be elsewhere in the village and 6% had no view.

6.12 274 people (60%) supported changing the use of properties within the centre of the village to provide more accommodation for shops and services. 333 respondents (73%) would support additional car parking close to the village centre if land could be identified and funding prioritised; 12% disagreed and 2% had no view. 392 people (85%) supported the proposal to improve pedestrian and cycle routes throughout the village especially from new development to help it better integrate.

How were the issues and concerns responded to?

6.13 The responses to the preferred option consultation have helped to inform the way that the Project Group has approached the development of the draft Neighbourhood Plan.

6.14 The plan identifies up to 280 dwellings to be accommodated on the preferred allocation site. This has been increased due to capacity testing by the developer David Wilson Homes, which could provide further housing here rather than recourse to other sites.

6.15 A site for a community hall in association with enhanced sports and leisure provision has been identified and could come forward through a range of funding opportunities. Additional reserve land for employment uses has been identified to extend the existing industrial estate and to provide facilities such as a small business centre if demand were sufficient.

6.16 A village centre core has been identified which will seek to protect retail and commercial uses and encourage the change of use to these activities if demand for additional accommodation is required. This will help to maintain and increase the economic vitality and viability of the village centre.

7. REGULATION 14 CONSULTATION

7.1 Neighbourhood Plan regulations require that a statutory consultation period of 6 weeks is undertaken by the responsible body on the final draft plan prior to its submission to the Local Authority in advance of their statutory Regulation 16 consultation.

Drafting the Neighbourhood Plan

7.2 The Neighbourhood Plan policies were drafted in close collaboration with the Borough Council of Wellingborough to ensure that the emerging policies were not in conflict with
the National Planning Policy Framework, were aligned to the Local Development Plan and that they were usable in a Development Management context. The Borough Council also assisted early consultation and liaison between the Project Group and statutory bodies including the Environment Agency, Natural England and the Northamptonshire Wildlife Trust in respect of requirements for a Strategic Environmental Assessment (SEA) and an Appropriate Assessment in regard to EU Habitats Regulations.

**Screening Opinions for Strategic Environmental Assessment and Habitats Regulation Assessment**

7.3 Two screening exercises were undertaken to ensure that the emerging plan would not have significant environmental impacts or *likely significant effects* on the protected characteristics of the Special Protection Areas (SPA) of the Upper Nene Valley Gravel Pits which partially cover the Neighbourhood Plan area.

7.4 The screening report for Strategic Environmental Assessment was issued to the Borough Council in October 2013 and consultation was undertaken with statutory bodies by them. A letter was issued by the Borough Council on 30th January 2014, following this consultation, stating that no formal Strategic Environmental Assessment would be required for the Plan.

7.5 Similarly a screening report for an Appropriate Assessment under the Habitats Regulations was issued to the Council in January 2014. Following consultation by the Borough Council a letter was issued on 6th February 2014 stating that no further Appropriate Assessment was required.

**Who was Consulted?**

7.6 The Regulation 14 consultation is specific about organisations and stakeholders that should be consulted. The legislation requires that prior to submitting the plan to the local planning authority the qualifying body must

- publicise it in a manner that is likely to bring it to the attention of people who live, work or carry on business in the neighbourhood area
- consult any consultation body referred to in paragraph 1 of Schedule 1 whose interests the qualifying body considers may be affected by the proposals for a neighbourhood development plan; and
- send a copy of the proposals for a neighbourhood development plan to the local planning authority.

7.7 All of the residents and businesses within the village were consulted together with a range of statutory bodies which was drawn up via a list with the Borough Council adhering to the requirements of Schedule 1 of the regulations. The landowners, developers and agents who had responded to the ‘call for sites’ consultation or whom the EBNPPG knew about were also contacted. A copy of the plan was also sent to the Local Planning Authority although they had been fully involved in the consultation process and finalising the draft plan.
How were they consulted?

7.7 The EBNPPG circulated a letter and response form (see Appendix 9) to all resident dwellings and businesses within the Neighbourhood Plan Area. This directed people to an online copy of the plan or hard copies could be viewed at various locations in the village or an individual copy could be requested. An article was published in Barton Today by the EBNPPG Chairman promoting the consultation and reminders were issued via the Earls Barton Appreciation Facebook site. The EBNP Website also prominently directed people to the plan from its home page. The letter indicated how to respond and provided the deadline by which representations needed to be returned. A free post service was once again provided and drop off points at the library and post office were also offered.

7.8 The plan was also sent by email to a list of consultation bodies mentioned above (See Appendix 10) with explanation of what was required for the consultation and the date when responses were required by. All consultation responses which received an invalid response message via email were followed up and alternative respondents were obtained. During the course of the consultation the key consultation stakeholders were contacted to enquire whether a response would be made.

7.9 A drop-in session was organised for 17th April 2014 for residents and businesses to obtain an update on the draft plan, ask questions of the steering group and provide comments and concerns on top of the formal consultation response forms.

What did the consultees say?

7.10 A total of 189 responses were made by members of the general public and businesses which included 4 returns from agents of landowners or developers. A summary of the responses is set out at Appendix 11. There was strong support for the plan’s policy areas with none of the policy proposals receiving less than 82% backing. Policy EB.DC1 and EB.T1 both received this level of endorsement whereas the support for policy EB.OS1 on Open Space and EB.D1 on Environment and Design issues had 92% and 91% respectively. Policies on the village boundary and local business were well supported (90%) and the allocation of housing, employment uses and Sports and Leisure facilities at the Grange received 86% support which was a very similar level to that expressed for the preferred options consultation. A full summary of the responses has been compiled within the document ‘EBNP Reg 14 Table of Public Comments and Response’ which is produced as a separate appendix (12) to this report.

7.11 In respect of the statutory bodies that responded a total of 13 responses were received. A healthcheck of the plan was also undertaken by the Neighbourhood Planning Independent Examiner Referral Service (NPIERS), organised through Planning Aid who have been providing support to the EBNPPG. This document has been most useful and the Project Group has treated it as a further statutory consultee response. All of these responses and the points raised have been summarised in a document ‘EBNP Reg 14 Table of Statutory Agency Comments and Response’. This is also produced as a separate appendix (13) to this main report.
7.12 The range of responses covered a multitude of issues. Responses from the public and businesses were greatest around issues concerning transport and parking followed by the ‘Grange’ development allocation site. Developer and landowner concerns centred on the plan’s potential conflict with the NPPF and its inability to fulfil the basic conditions requirement within the Neighbourhood Planning regulations. Specific issues were raised in respect of individual policy wording and clarification for some of the justification sections which has been helpful. Most comments or proposed changes were covered by suggested alterations considered under the Statutory Agencies responses.

7.13 The Statutory Agencies response has included detailed comments from English Heritage, Natural England, the North Northamptonshire Joint Planning Unit, Highways Authority, Environment Agency, Nene Valley Nature Improvement Area, Borough Council of Wellingborough and, as stated above, the healthcheck from NPIERS.

7.14 The responses were in general supportive of the approach taken by the EBNPPG and the policies that were being pursued in the draft plan. Specific changes have been recommended to the plan and these are detailed in Appendix 12 and 13 the main general issues arising from the consultation are as follows;

Neighbourhood Plan Village Boundary - particular anomalies with the boundary questioning why certain areas were either within or outside of the boundary line or whether a criteria based policy might be more appropriate;

Justification of the Housing Target – this issue was raised by developers and agents and also by the NPIERS healthcheck and Borough Council. Understanding the methodology of how the Project Group arrived at the housing target, without a figure to adopt from a higher level plan, was felt to be important;

Provision of Open Space and Potential Impact of Development on the SPA – Natural England and the Nene Valley Nature Improvement Area both commented on the Open Spaces Policy and the potential impact from greater visitors to the SPA. Although this is not an issue which is likely to trigger an SEA or Appropriate Assessment under the Habitats Regulations it is considered necessary to limit any further increase in visitor pressure – especially from dog walkers in this area;

Strengthening the Protection for the Built Historic Environment – English Heritage and the Borough Council of Wellingborough suggested changes to strengthen the wording for the policy and justification text for the Environmental and Design Policy (EB.D1) and suggest removing certain criteria within the policy which are also present in the Core Spatial Strategy;

Public Transport Not Sufficiently Supported – The Highways Authority and North Northamptonshire Joint Planning Unit raise issues with the evidence for Policy EB.T1 and that the policy is too tightly focussed around parking issues linked to the ‘areas of constrained access’.
How were the issues and concerns responded to?

7.15 All of the issues raised through the Regulation 14 consultation have been summarised in Appendix 12 and 13 and responses have been given by the Project Group with any proposed changes to the Plan that are considered necessary. Wherever possible and practical the Project Group has sought to take on board suggested changes or amendments to improve the plan and to address the concerns that have been raised. This has not been possible in all cases and where this is the case the Project Group has sought to provide a reason why this change cannot be incorporated.

7.16 In relation to the main issues listed above the Project Group has considered the following;

Neighbourhood Plan Village Boundary – The boundary has been altered in relation to 2 main areas with the inclusion of the White Lodge residence and associated buildings around the vineyard at the junction of the A4500 and Northampton Road within the boundary. Land off Compton Way has also been included where a planning consent has now been implemented. A small change to the criteria for the village boundary has also been made.

Justification of the Housing Target – The Project Group considers that the housing target for the village is founded on a robust methodology worked up in collaboration with the Borough Council and Joint Planning Unit. Further clarity could be provided as to how this was achieved, in addition to the existing Appendix 3 within the draft plan, therefore a separate background report has been produced to set out how this quantum of development for the plan period was arrived at.

Provision of Open Space and Potential Impact of Development on the SPA – concerns regarding the increased pressure from recreation uses in the SPA have been addressed within the text for policy EB.OS1 with an acknowledgement that further mitigation measures may be required and a monitoring indicator has been added.

Strengthening the Protection for the Built Historic Environment – alternative wording suggested by English Heritage has been used to strengthen the policy for EB.D1 and enhance the protection for the historic built environment. A commitment within the justification text for EB.D1 identifies that the Parish Council will work with the Borough Council to expand the list of local community heritage assets where appropriate.

Public Transport Not Sufficiently Supported – this has been responded to by highlighting the permissive right of way to be established across the sports and leisure land providing easier access to the X4 bus service. Also the Project Group has carried out surveys to justify the location and extent of the ‘constrained areas of access’.

8. CONCLUSIONS

8.1 The level of community consultation and engagement undertaken during the production of the Earls Barton Neighbourhood Plan has been varied and extensive. It
has reached a wide range of the local population especially through leaflet surveys which have gone out to the whole community and from follow-up drop-in sessions. A wider variety of groups and different sections of the community have participated or commented on the emerging draft Neighbourhood Plan.

8.2 The comments received at each stage of the Neighbourhood Plan have been fully considered and have helped to guide and shape the form of the Plan so that it is truly reflective of what local people wish to see happen for their village.

8.3 This Consultation Statement and the supporting appendices are considered to comply with Section 15(2) of part 5 of the 2012 Neighbourhood Planning Regulations.
Appendices

Appendix 1: Launch Event Poster & Agenda

---

**Earls Barton Neighbourhood Plan Project Group**

*Will be holding Launch Events at:*

- 7.30PM – Wed 18 April – EB Infant School
- 10AM – Sat 21 April – All Saints Church Hall

*We need your input, views and opinions to shape a Neighbourhood Plan for Earls Barton, to help determine future growth and development for our village.*

**Earls Barton Needs You... Please Attend If You Can!!!**

For further information visit www.earlsbartonneighbourhoodplan.org.uk

Appendix 3: Launch Event Workshop Photographs
Appendix 4: Exhibition Boards for Vision, Objectives & Strategic Options Consultation

What is the Neighbourhood Plan?

About Today’s Event
The Earls Barton Neighbourhood Plan Project Group is producing a Neighbourhood Plan sponsored by the Parish Council which will let local people have a say in how Earls Barton is going to develop over the next 20 years. We have held several events and sent out surveys to find out what you like about Earls Barton, what you don’t like and what you’d like to see changed. You have helped us to understand the key issues that concern you and shared a wide range of ideas for the future of the village. Now is the time to start to think about what these ideas could mean in reality. At this event we want your views on the Vision and Objectives for Earls Barton and what your thoughts are on various strategic options for future development.

What you like about Earls Barton
- Local facilities
- Rural setting & open spaces
- Village centre
- Conservation area
- Schools

What don’t you like about Earls Barton
- Local facilities
- Village centre
- Conservation area
- Schools
- Rural setting & open spaces

What your concerns are for future development
- Traffic congestion
- Need to renovate under-used buildings
- Impact on doctors/dentists etc
- Impact on local parking

A Vision for Earls Barton

Draft Vision
‘Earls Barton will continue to be a thriving community delivering better facilities and services for a growing population while retaining the key features of Earls Barton life’

Proposed Vision
From what people have told us a Vision for Earls Barton has been created through to 2031, the period of the Neighbourhood Plan. This is now being tested through consultation with the community.

To make the Vision a reality and to focus on a number of key priority which you have identified four objectives have been created,

Objective 1
Improve resident’s quality of life by improving the facilities and services within the Earls Barton

Objective 2
Allow some housing and commercial development to meet the needs of local people and increasing local employment opportunity while providing some degree of growth

Objective 3
Protect and conserve the best heritage assets and environmental features within Earls Barton Parish and promoting high quality design in all new developments

Objective 4
Increase accessibility within Earls Barton by providing better parking and to other communities through improved public transport links and other modes of transport.
What does this mean for Earls Barton?

The population of Wellingborough and Northamptonshire is growing like the rest of the country and Earls Barton will need to plan for more housing, employment and new community facilities. Each local area is required to plan housing needs of its local residents as a minimum.

The Neighbourhood Plan needs to be in line with ‘higher level’ planning policy. This means that it should reflect what is in the North Northamptonshire Core Spatial Strategy and the emerging Wellingborough Local Plan. However, these strategies are not complete and therefore the Neighbourhood Plan has the opportunity to influence these from the ‘bottom up’.

A Housing Needs Survey was carried out in collaboration with the Borough Council to establish what the minimum amount of affordable housing is required for Earls Barton. The Project Group has developed some Strategic Options of how Earls Barton might grow in the future. This is based on a minimum level of development, a medium scenario and a large scale extension. All the options have their positive and negative points.

Housing Needs Survey

The recent Housing Needs Survey updates a previous one for the village undertaken in 2008. They should be reviewed every 5 years and as the village is undertaking a Neighbourhood Plan this is a critical part of the evidence base.

The results of the survey indicate that 51 affordable houses are needed – 42 of these are for social rent and 9 are shared ownership. A further 12 people stated that they had a need for market housing which they could afford to buy.

If housing is delivered in line with current planning policy – where 30% affordable housing is normally delivered as part of housing developments – the project group estimate that a minimum of 106 houses are required to be allocated for Earls Barton over the period to 2031 in addition to the Redrow development.

This is a minimum figure. Neighbourhood Plans can decide to allocate more housing and this may bring with it other benefits.
Option 1 – Dispersed Development Within and Around Earls Barton (105 dwellings)

Benefits
- Minimum growth needed for Neighbourhood plan objective
- Dispersed Development
- Well built and well-sited in edge of Earls Barton for development
- Site considered on site suitability

Concerns/Issues
- Greater number of smaller sites needed
- Limited improvement of facilities
- Sustainability of shops and other facilities in doubt
- No additional employment sites
- Increased pressure on schools intake

4.5% increase in number of houses in Earls Barton

Option 2 – Northern Development/Medium Growth (150-250 dwellings)

Benefits
- Development at edge of Earls Barton
- Increased traffic does not go through centre
- Potential to deliver community benefit
- Better parking – community centre and sports and leisure facilities
- Improved sustainability of town and other service for larger population
- Potential for additional employment needs

Concerns/Issues
- Large single development on edge of Earls Barton
- Community benefits not achieved
- Higher pressure on schools intake
- Increase on other school numbers
- Some new community facilities not considered

10.6% increase in number of houses in Earls Barton
Option 3 – Southern Development/Major Growth (200-400 dwellings)

**Benefits**
- Development at edge of Earls Barton
- Potential for relief road from Barton
- Potential to deliver significant community benefits – leisure, sports and leisure facilities
- Improved sustainability of shops and other services
- Strategic need for additional employment area

**Concerns/Issues**
- Very large single development on edge of Earls Barton
- Stress on schools
- Additional benefits may not be realised
- Sustainable community facilities not realised
- Contribution to infrastructure and open space

17% increase in number of houses in Earls Barton

---

Option 4 – Your suggestions

**Benefits**
- ?

**Concerns/Issues**
- ?
Earls Barton Neighbourhood Plan – Consultation Statement v2

Previous development

Earls Barton has seen significant growth in previous decades. The total number of households has grown from 1,081 in 1951 to 2,342 in 2011.

The period between 1961 and 1981 saw the greatest growth – 63% increase. More recently (1991 to 2011) the village grew by 24%.

Population growth closely mirrors the growth in households. In 1951 the population was 2,615 and it has now risen to an estimated 5,668 in 2011.

Where are we in the process?

Timeline:

1. Getting Started
2. Identify Issues
3. Vision & Objectives
4. Options
5. Draft Plan
6. Consult
7. Examination
8. Vote/Adopt

- Feb 12: Community Event II
- Apr 12: Community Event III
- Nov 12: Formal consultation W/B
- Jul 13: Referendum
The Project Group is interested in working with all stakeholders within Earls Barton to understand the views of different residents and sections of the community as to what their future needs are and how best these can be provided for.

Engagement with Local Business
We are particularly interested in further contact and work with the business community. If you are a business within Earls Barton would you be interested in attending a meeting which could specifically address business issues? If so please contact one of the Project Team and leave your details.

Next stages
The next stage of the Neighbourhood Plan is to put together some detailed options and to test these before developing a draft plan and working up policies based on a refined Vision and Objectives from this round of consultation.
Appendix 5: Survey Questionnaire for Vision, Objectives & Strategic Options Consultation
Appendix 6: Workshop and Drop-in Session feedback – Vision, Objectives & Strategic Options

Earls Barton Neighbourhood Plan – Vision & Objectives Community Events

Community Presentation & Workshop Thurs 15.11.12 Number attended - 15
Drop-in Session Sat 17.11.12 Number attended – 41

Feedback on Vision:
Reference needed to – Living village; not suburbia/dormitory community (as written [vision] could be applied to similar community in Northants).

Not clear what vision means or refers to. Need to be clearer e.g. what are the key feature making up Earls Barton ‘life’.

Feedback on Obj1:
Maintaining existing services as well as improving the facilities and services – sustainability, maintaining the infant/junior schools.

Important to keep current shops, library and possibly add to them, such as hardware and electrical retailers.

Better services and shops.

Another playing field on recreation ground because it is difficult to play netball when others are playing football.

Feedback on Obj2:
Emphasis of any development should be on housing for the elderly (life time homes idea could be looked into); special needs housing and starter homes. No big ‘unaffordable’ houses (like the Dell).

Broadly agree, affordable housing is key to attract young families.

Build a senior school to avoid travelling out of the village

Feedback on Obj3:
Design to blend in with current buildings

Right wording – new design must maintain existing heritage character – not visually intrusive.

Feedback on Obj4:
Maintain public transport; not necessarily improve.

Any development should include linking footpaths, like New Barton, Saxon Rise, London End have.

What constitutes better access?
Feedback on Strategic Option 1:

Positives – Minimal impact on surrounding countryside – opportunity to improve areas

Negatives – Developers/builders won’t like it. – Existing facilities would have to cope with any new housing in-fill. Traffic problems would not be relieved in the centre of the village – traffic problems hamper village if as no funding to solve traffic/parking problems – ‘A vote for status quo’ – Not enough land for in-fill – access issues, not as problematic on some of the peripheral sites.

Overall comments – Should be a mixture of in-fill and mixture of smaller sites on the edge – preferred option but understand that practicalities of landowners/builders profits make it unlikely to be a feasible option.

Feedback on Strategic Option 2:

Positives – Traffic not coming through the centre of the village – traffic access directly onto main roads (A4500), N’pton Road and W’boro Road – Community facilities likely – Better option for mix of uses – possibility for cemetery extension and more allotments – contained development

Negatives – People more inclined to drive in, as perceived to be a long way out of the village centre and schools – severed from the rest of the village but can be made to work (footpath links to Elizabeth Way, road access through industrial estate) – Children driven to school which would lead to traffic problems around increased school entrance – loss of community as a bespoke development.

Overall comments – Best of a bad bunch – Sewage issues? Does this site need to have a technical solution to connect any new houses to mains sewers, pumps perhaps? A water main also runs across the site.

Feedback on Strategic Option 3:

Positives – Provide additional facilities (but not school) – Relieves pressure on traffic flow in centre of village but not parking –

Negatives – Greater impact on existing primary school facilities, no additional school – Parking problem increases – becomes one single community – Dormitory houses – only benefit would be the link road – Link road allows development all the way up to bowls/tennis club – too big (400 houses) too much pressure on schools etc – Station Road just couldn’t cope
Appendix 7: Preferred Option Consultation

Earls Barton Neighbourhood Plan – Consultation Statement v2
Appendix 8: Sample of Consultation Feedback and Progress Updates on Neighbourhood Plan
Appendix 9: Regulation 14 Consultation Letter on Draft Neighbourhood Plan and Response Form

Dear Resident/Business Owner,

The Earls Barton Neighbourhood Plan Project Group has now completed the draft Neighbourhood Plan and we want to get your views to ensure we are on the right track and that you agree with the strategy we have developed on your behalf. The Plan can be downloaded or accessed at www.earlsbartonneighbourhoodplan.org.uk or a hard copy can be viewed at the library, both Doctor’s Surgeries and Espresso Coffee Shop. If you would like a hard copy of the plan please contact us on 01604 812115.

This is your draft Neighbourhood Plan! It has been drawn up using the views you have given us during all the consultations which have been held during 2012 and 2013. We now need your comments before it goes on its next round of consultation, which will be conducted by the Borough Council of Wellingborough.

It’s very important that you take the time to read the draft Plan and give us your views, as these will add strength to the proposals. If you disagree with anything, we need to know so that we can take this into account and make amendments where appropriate.

YOUR opinions are valuable – it’s YOUR community and village, please let us know what you think.

A comment sheet is provided with this letter for you to use and then return to the Parish Clerk at the address below or drop off at the village library or Post Office. Remember the plan can be accessed online at the above address or you can request a hard copy.

The consultation period lasts for 6 weeks so your comments should be returned by 30 April 2014 to the following address. If you have any questions regarding the plan (no stamp required) Please contact:

Schedule 1 of the Neighbourhood Planning (General) Regulations 2012 requires the following consultation bodies to at the very least be contacted at the formal consultation stages (set out at Regulation 14 and 16). It is the advice of BCW that they are in fact consulted at as early a stage as possible to seek their informed view on any aspect of the Neighbourhood Plan where their input and expertise will be of use. This is particularly relevant when assessing the viability and suitability of individual development sites. It should be noted that most, if not all, will already have been made aware of your NP process as BCW will have consulted with them prior to the designation of your neighbourhood area.

The letters in (brackets) cross reference each contact with the relevant consultee identified in the footnote of this schedule.

area; and

(q) bodies which represent the interests of disabled persons in the neighbourhood area.
Appendix 11: Summary of EBNP Regulation 14 consultation public responses

EARLS BARTON DRAFT NEIGHBOURHOOD PLAN (REGULATION 14 CONSULTATION)

Summary of Neighbourhood Plan Draft Consultation Responses

The Draft Neighbourhood Plan was delivered to all 2,354 households in the Parish and by the end of the six week consultation period a total of 189 responses had been received from the local community representing a response rate of approximately 8%. Thirteen responses were also received from statutory agencies.

Residents were asked to respond to the strategy and draft proposals outlined in the Plan. These included:

- The village boundary: 90%
- The ‘Grange’ development site allocation: 86%
- Windfall and general development policy: 87%
- Environment and design: 91%
- Open Space: 92%
- Local business: 90%
- Employment: 89%
- Transport and parking: 82%
- Developer contributions: 82%

Apart from a basic tick box to indicate approval or disapproval, residents were provided with space to comment further on each proposal if required. In total, 69% of respondents agreed with all of the proposals in the Draft Neighbourhood Plan. A further 6% agreed with all of the sections apart from leaving one or more of the boxes blank. Four of the responses were from landowners/agents or developers and were in the form of letters therefore their entries are blank but are included for completeness, a further two also had to be recorded as blank as they attached a letter or did not complete the boxes. The support for the individual policy areas is shown above.

In terms of the responses received, 58% of respondents made comments on one or more of the policy areas. These have been compiled and summarised in the document ‘EBNP Reg 14 Table of Public Comments and Response’ which can be accessed on the Neighbourhood Plan website. Of the comments made the most numerous were for transport and parking (68) followed by the
Grange Allocation (48). The totals for all the comments received and percentage against the total amount of responses is set out below.
